Bates Green Garden was designed and planted from 1968 by the late Carolyn McCutchan, a skilled plantswoman.

The Garden is unique in its selection of many unusual plants, including mature trees and shrubs. It continues to evolve, featuring colourful and imaginative plantings.

The distinct areas of the garden offer a sensory experience with bulbs, grasses, herbaceous and woody plants providing colour, scent and texture in all seasons.

- **The Front Garden** has wonderful autumn colour and sings out in late winter when the low sun lights up the many *Cornus* and *Salix* stems. Snowdrops, aconites and *Crocus* herald the spring.
- **The Middle Garden** is formal in its layout, with exuberant planting which has recently been redesigned to adapt to our changing climate.
- **The Woodland Garden** contains a fine collection of *Narcissus*; a majestic oak tree presides over this area providing welcome shade throughout the summer months.
- **The Wildflower Meadow** has mown paths through its six acres with seating and fine views of the South Downs.

Bates Green Garden is a peaceful space, full of birdsong, with plentiful places to sit, relax, and immerse oneself in nature.

Beatons Wood (home to the Arlington Bluebell Walk) is a captivating 24 acre oak and hornbeam wood, accessed from the Garden through the Millenium Avenue which is full of wild daffodils in early spring.
